

211

STENCIL FILLER

INTERTAPE POLYMER GROUP® TECHNICAL DATA SHEET

DESCRIPTION

211 stencil filler is specially formulated to work with most stencil products' adhesive and create a better bond to the substrate during sandblasting. This extra bond helps small, intricate designs to stay attached to the substrate and not lift when sandblasting pressure is applied. 211 filler is a formulated high tack adhesive for hand cut products.

COMMON APPLICATIONS

Designed for use with stencil 111 and 117. On polished surfaces, it is recommended that a light coat be applied. For best results on frosted, axed, or steeled surfaces, apply two coats.

NOMINAL VALUES

The following data is considered typical and should not be used for technical applications

Color	Off-White, Milky Tan
Viscosity (@72°F)	1000 - 1800 cPs
Flash Point	51°F
Solids	19.9% - 21.5%
Solvents	Toluene, Heptane
